Session Agenda

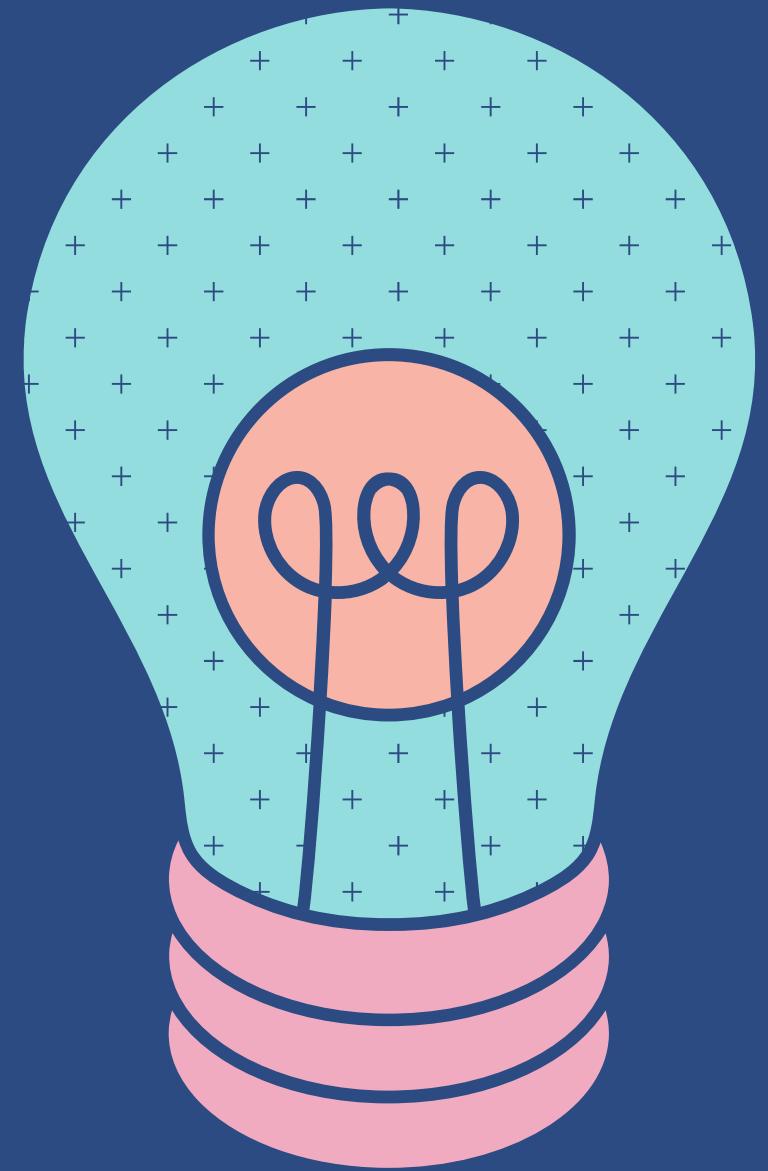

GETTING STARTED WITH CSS

- Think It Through
- Recap
- HTML class and id
- Adding CSS to HTML5
- CSS Selectors, Properties and Values
- Setting Text and Background Colour
- Adding Background Images

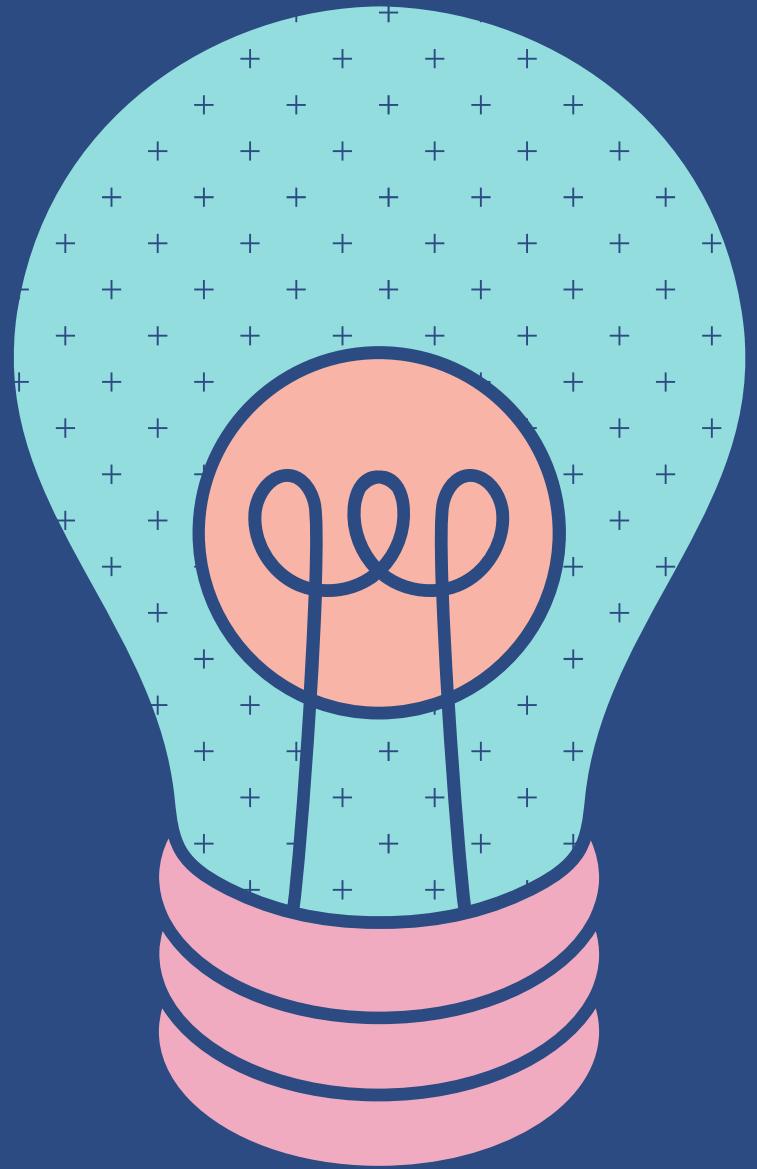

**“The person who makes it,
sells it. The person who buys
it never uses it. What is it?”**

#ThinkItThrough

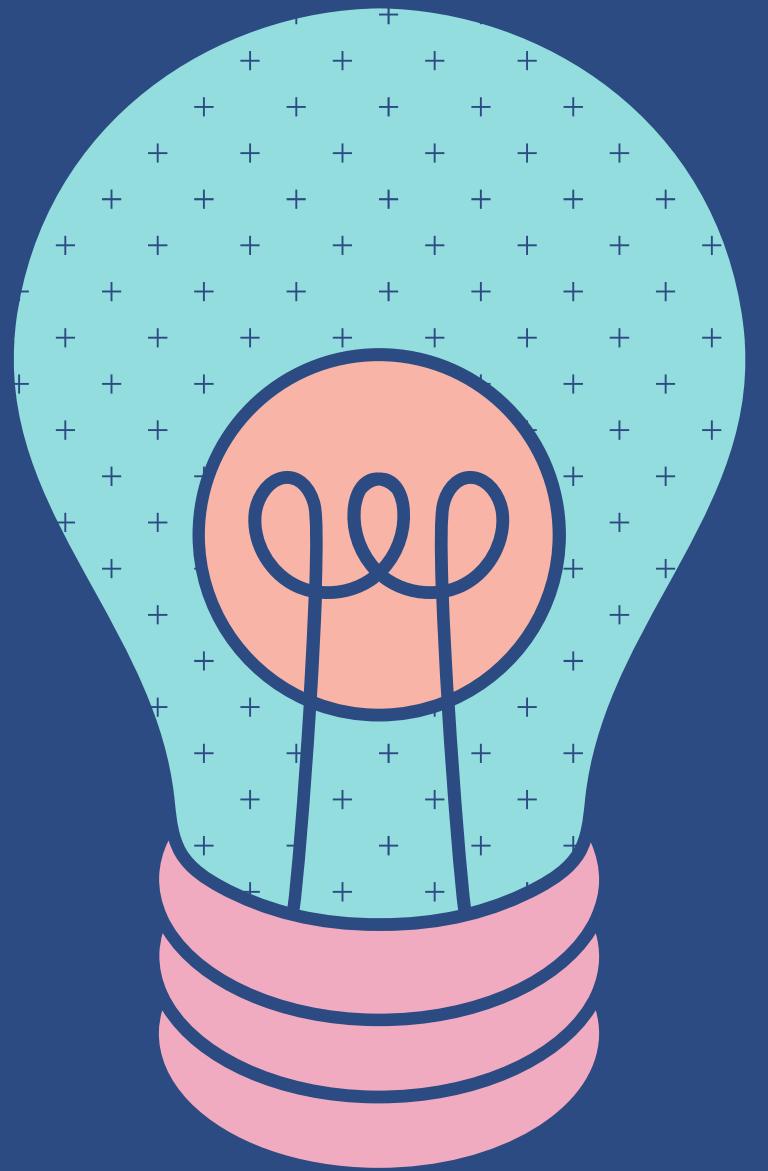

**“I can be long or short. I can be
grown or bought. I can be
painted or left bare. What am I?”**

#ThinkItThrough

**“I'm a word of letters three,
add two and fewer there will
be. What am I?”**

#ThinkItThrough

```
<div class="wrap">
  <div class="first">
    <img alt="Background image" data-bbox="0 0 1000 1000"/>
  </div>
</div>

<div class="wrap_2stroke">
  <div class="second">
    <div class="second_content">
      <div class="block">
        <h3>October 2017</h3>
        <img alt="Background image" data-bbox="0 0 1000 1000"/>
      </div>
    </div>
  </div>
</div>

# main.css
@import url("style.css");
background-color: #333333;
```

HTML class and id Attributes

Do you have any questions?

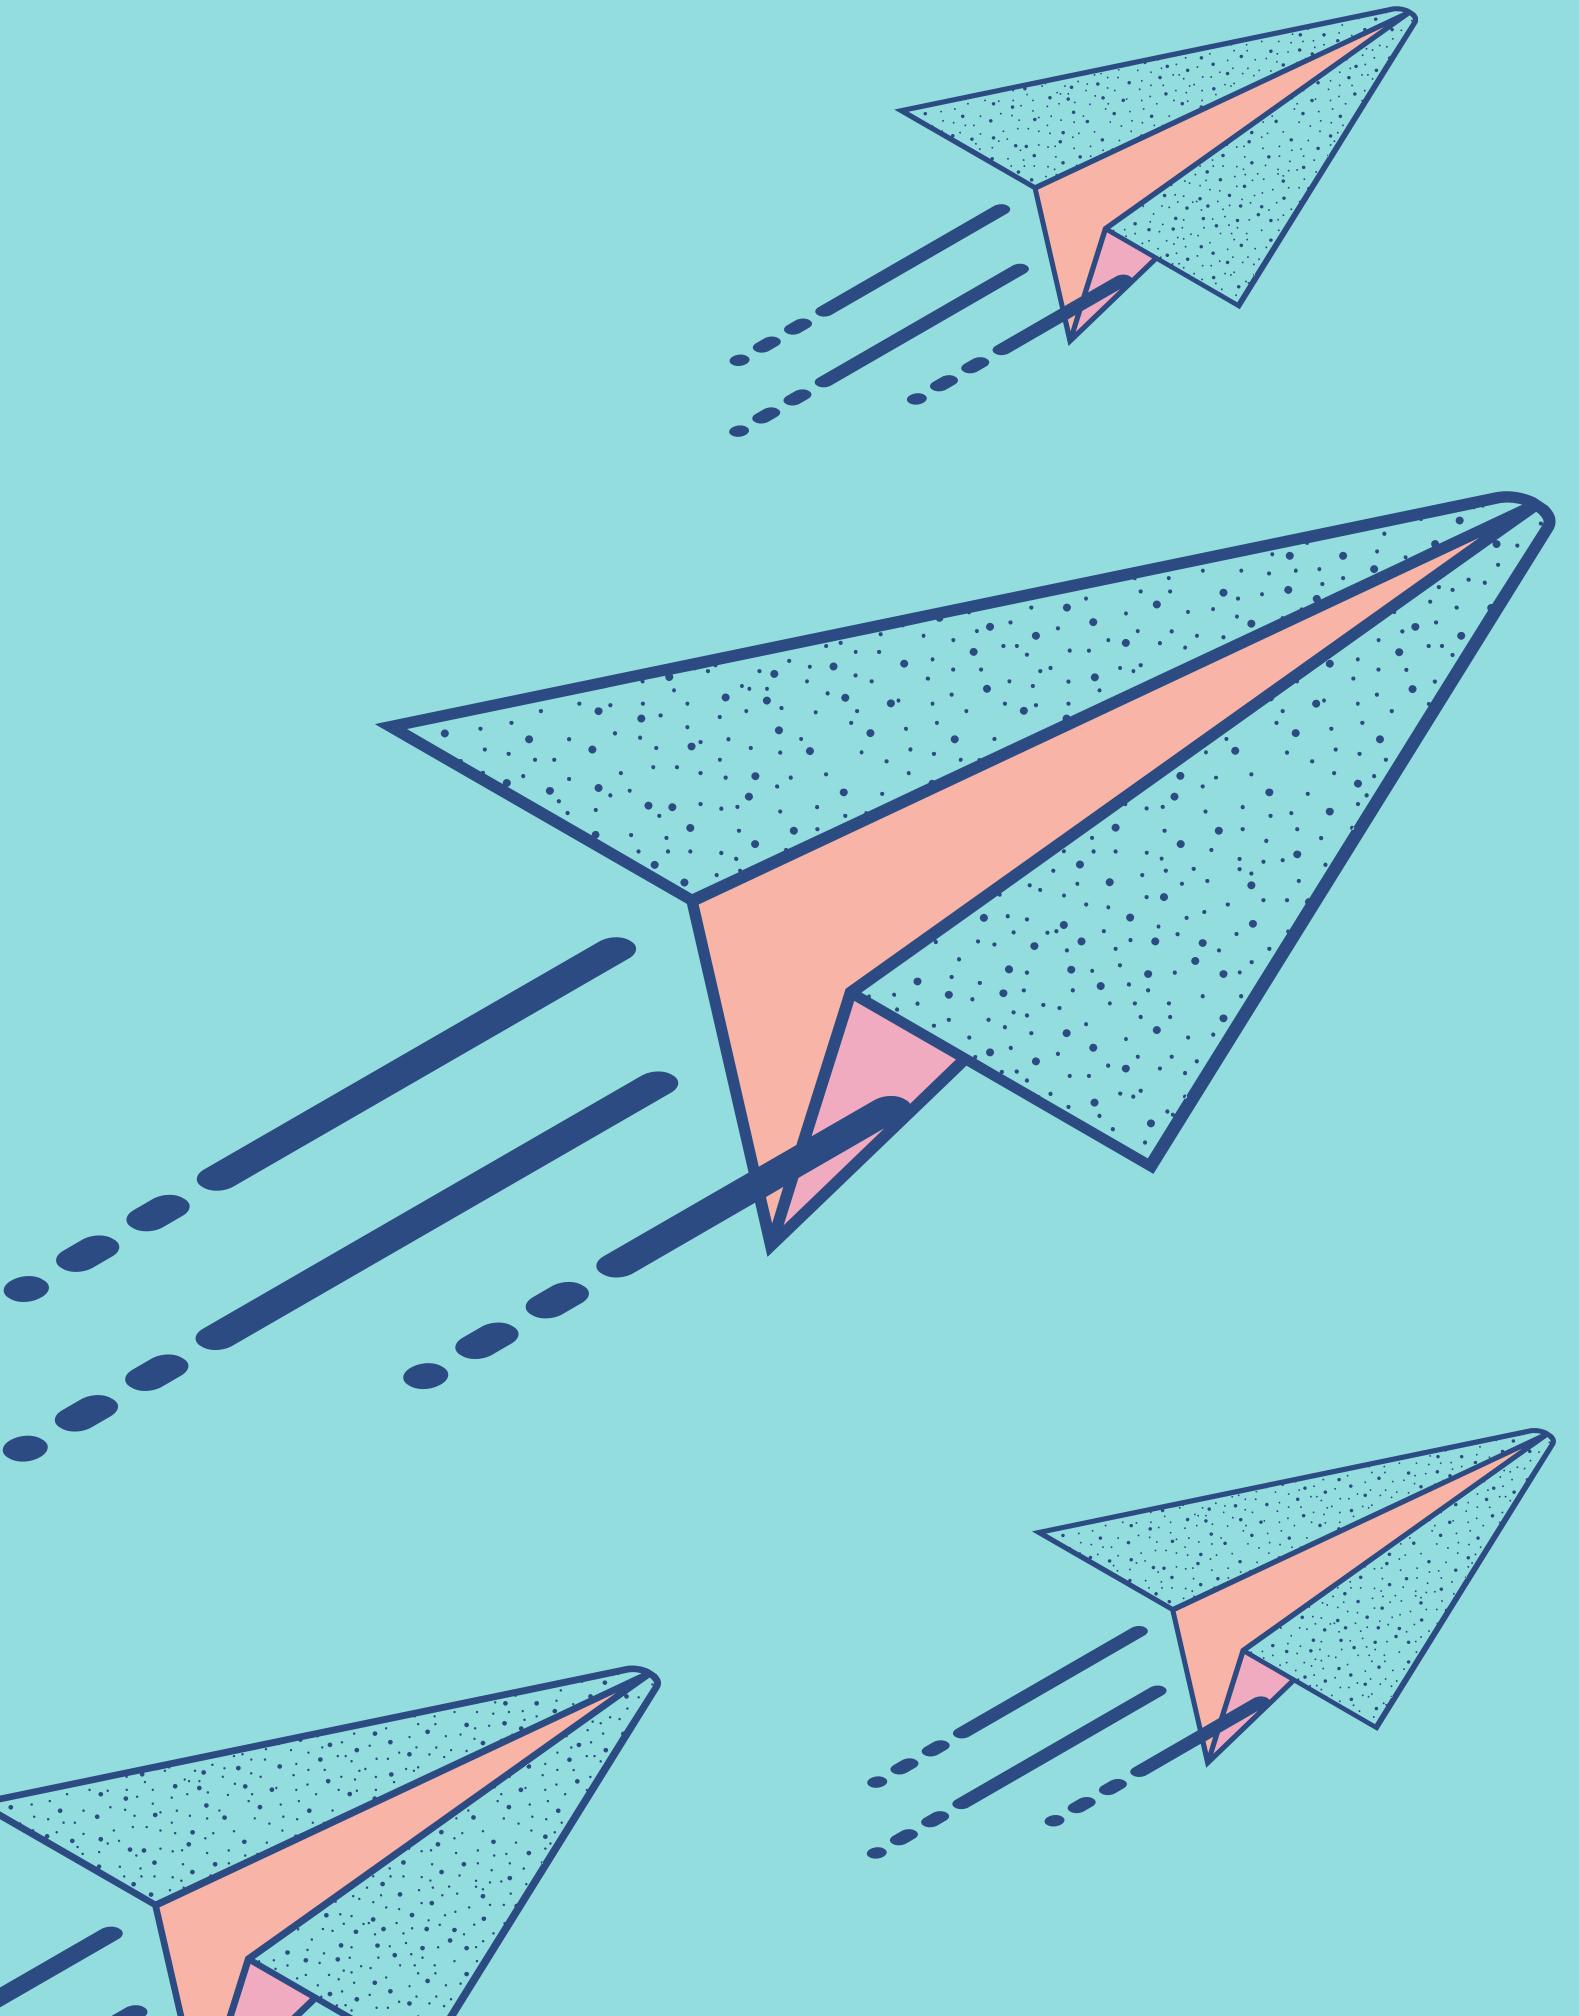

Adding CSS to HTML

- External CSS
- Internal CSS
- Inline CSS

Do you have any questions?

CSS Selectors

Universal Selector

*

ID Selectors

#id

Element Selectors

<tag>

Group Selectors

p, .para, #special

Class Selector

.className

Do you have any questions?

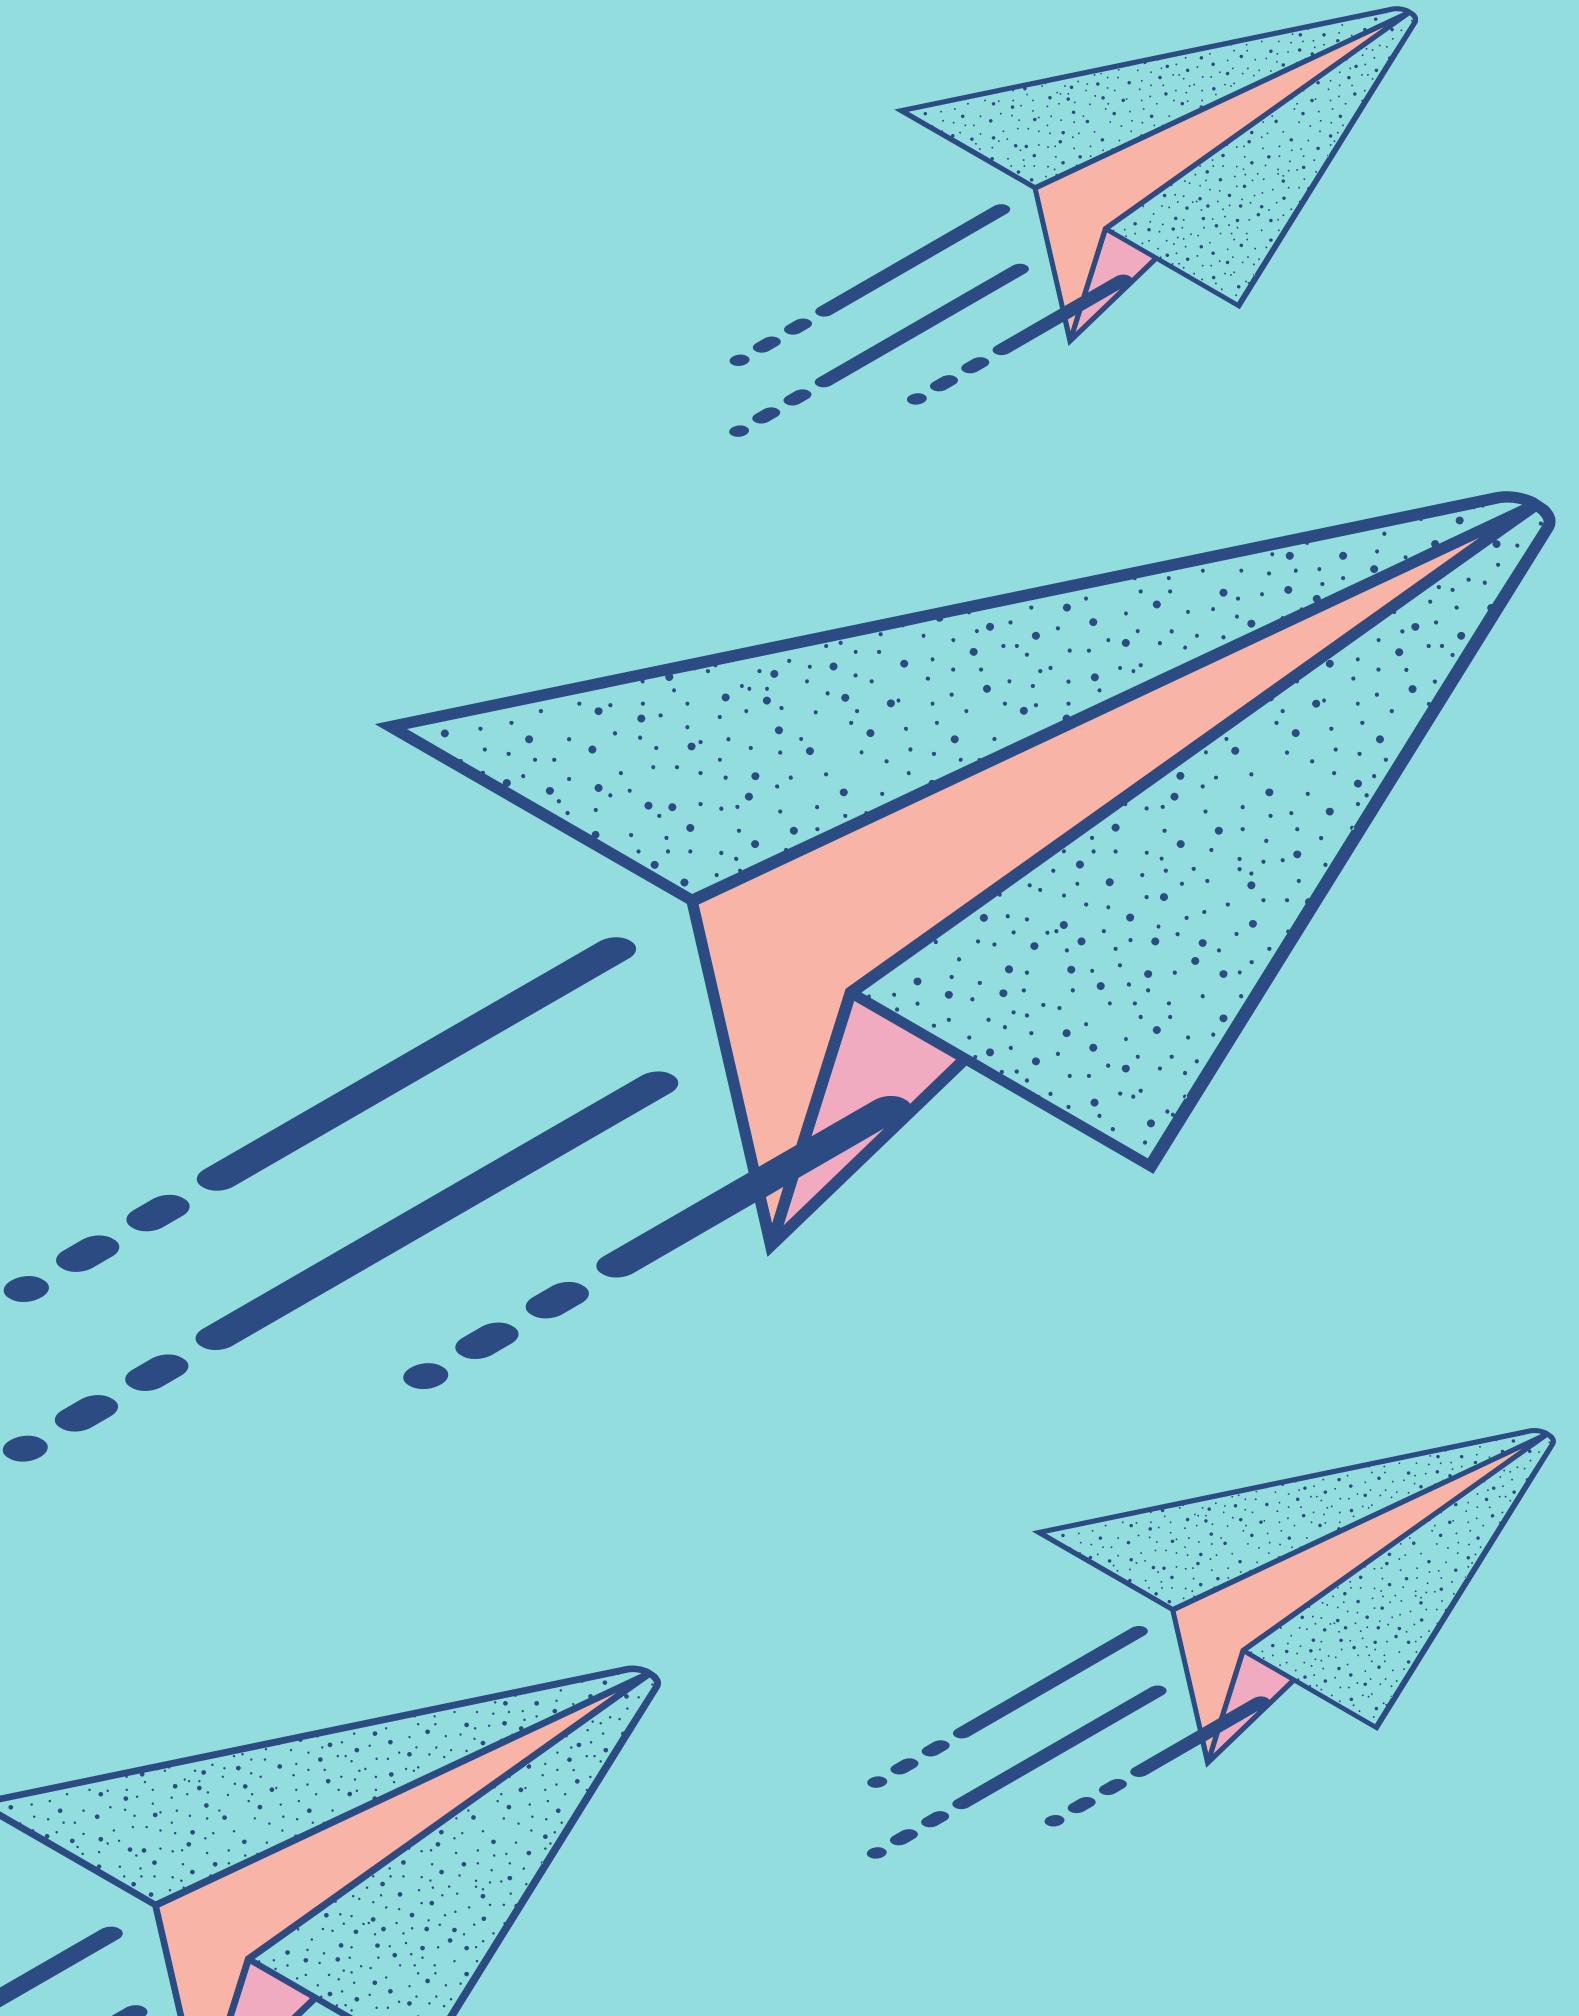

Setting Text and Background Colour

```
{  
  color:  
  background-color:  
}
```

Do you have any questions?

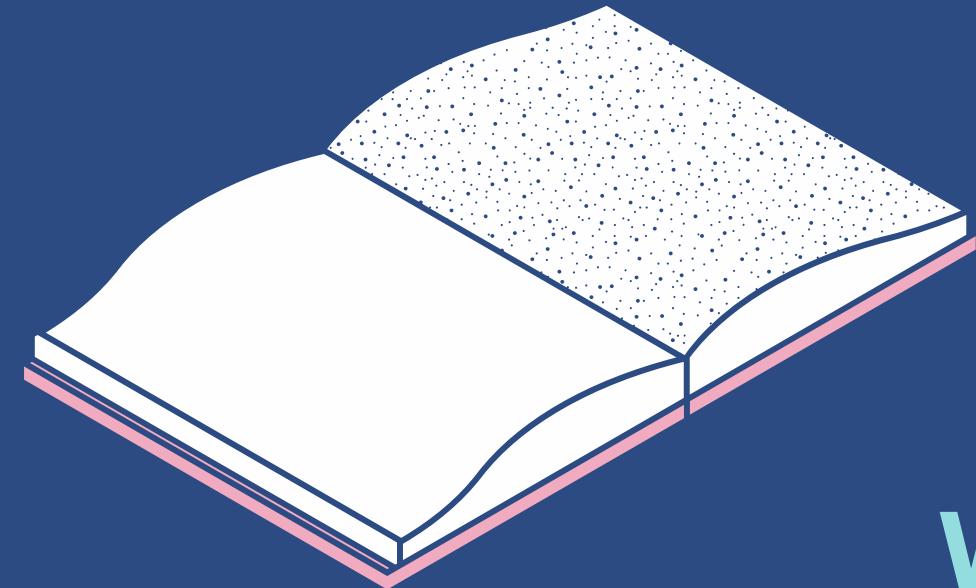

Adding Background Images

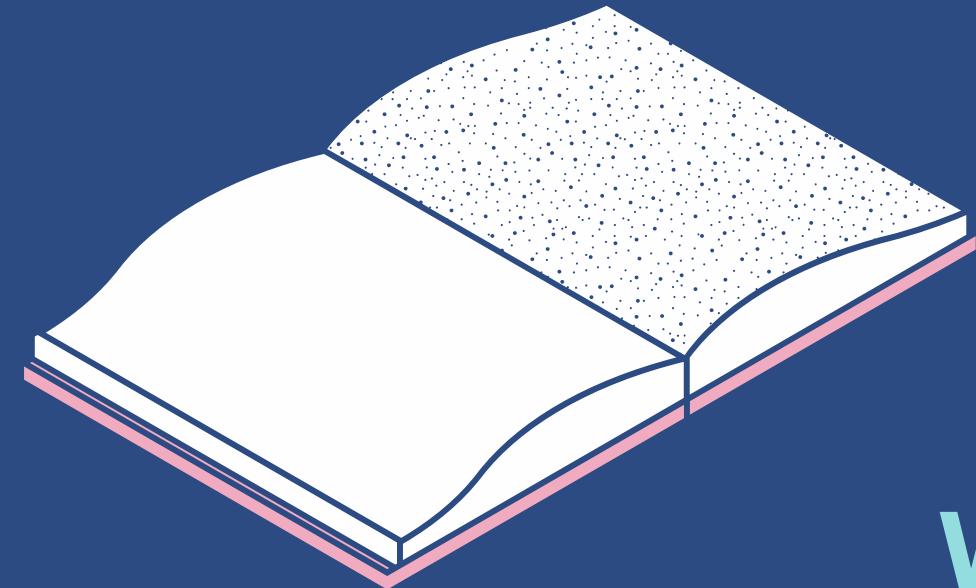

Do you have any questions?

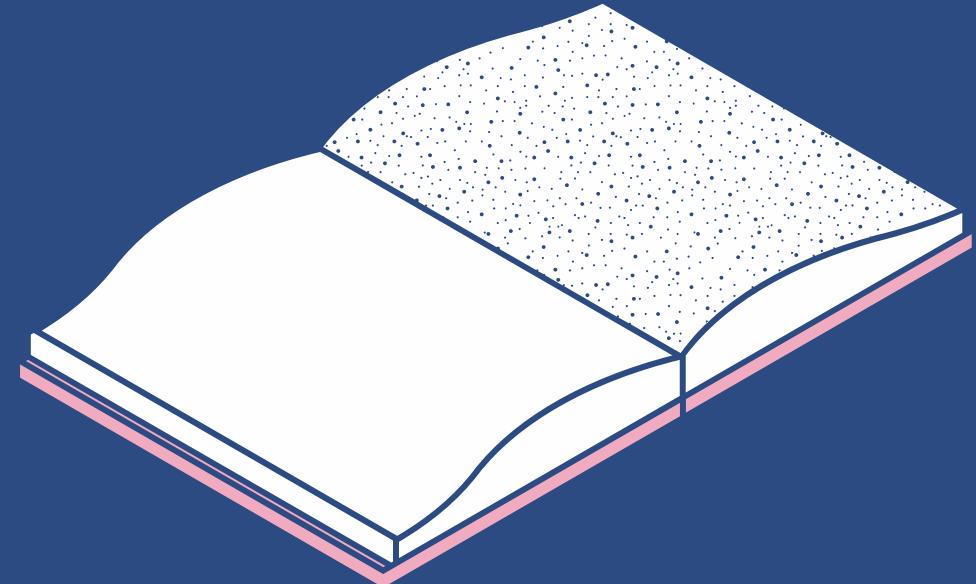

When adding CSS to your HTML, you are told that there are three different ways - External CSS, Internal CSS and Inline CSS. Which of these is the most specific?

1. External CSS
2. Internal CSS
3. Inline CSS
4. All of these have the same specificity

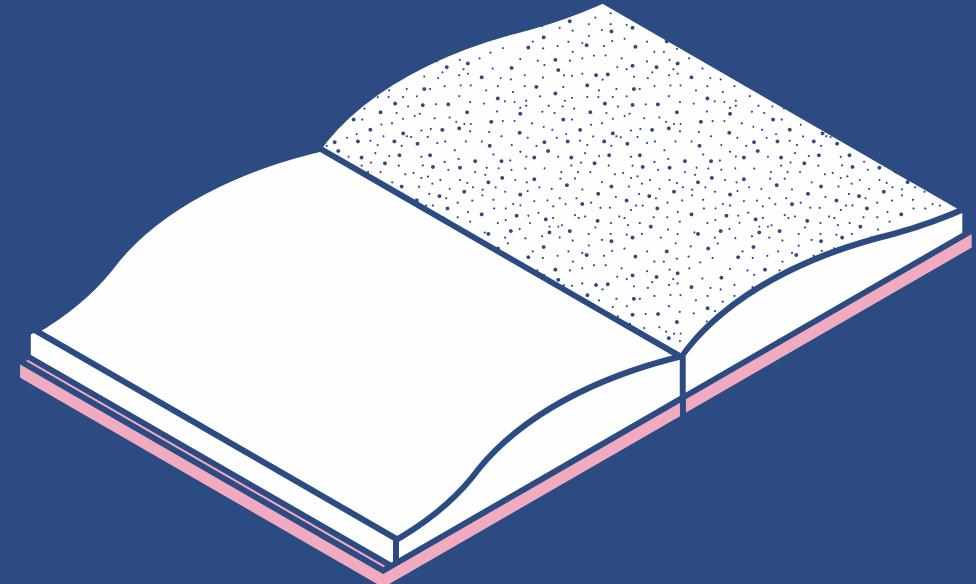

When adding CSS to your HTML, you are told that there are three different ways - External CSS, Internal CSS and Inline CSS. Which of these is the most specific?

1. External CSS
2. Internal CSS
3. **Inline CSS**
4. All of these have the same specificity

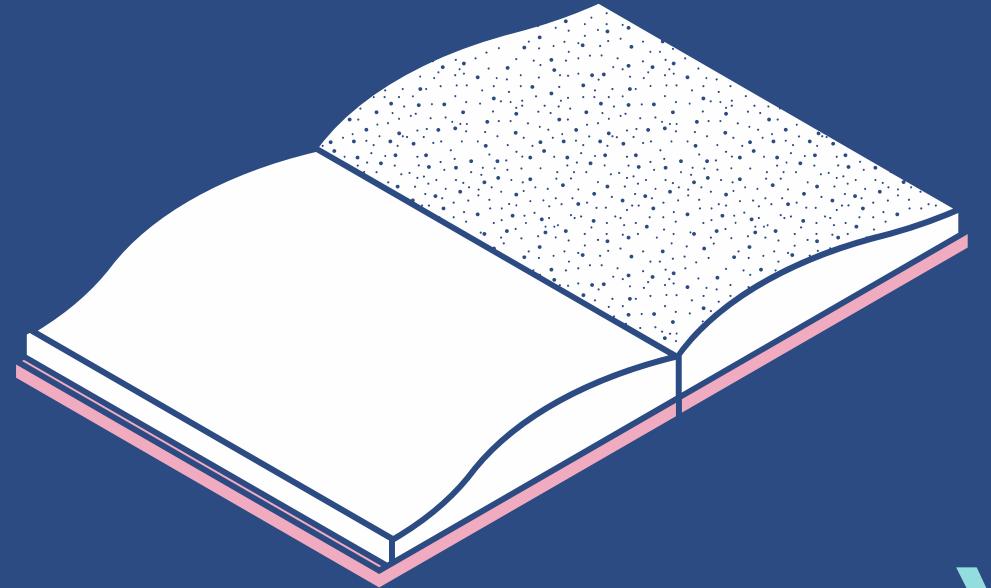

You are required to add a common style to a few list items on the page.
Which of the following selectors would you use for this task?

1. Universal Selector
2. Element Selector
3. Class Selector
4. ID Selector

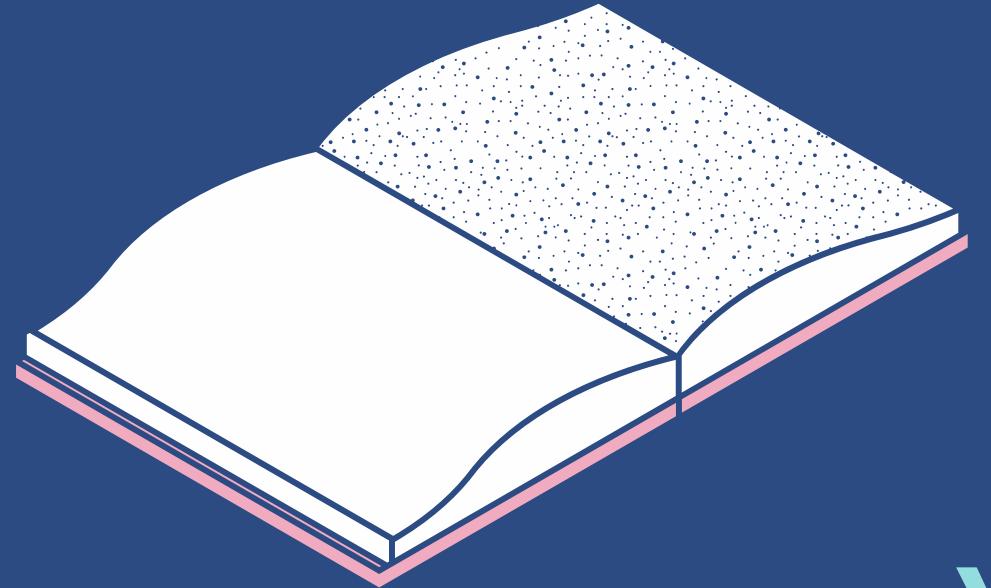

You are required to add a common style to a few list items on the page.
Which of the following selectors would you use for this task?

1. Universal Selector
2. Element Selector
3. Class Selector
4. ID Selector

You are trying to link an external CSS file to your HTML. Which of the following is the correct syntax?

1. `<link rel="stylesheet" href="style.css" />`
2. `<link rel="stylesheet" src="style.css" />`
3. `<style rel="stylesheet" src="style.css" />`
4. `<style rel="stylesheet" link="style.css" />`

You are trying to link an external CSS file to your HTML. Which of the following is the correct syntax?

1. `<link rel="stylesheet" href="style.css" />`
2. `<link rel="stylesheet" src="style.css" />`
3. `<style rel="stylesheet" src="style.css" />`
4. `<style rel="stylesheet" link="style.css" />`
